Journal of Sports Sciences, 1986, **4**, 264–265

Subject index

Abseiling, stress, inoculation, anxiety, stress, heart rate, 229
Acetylcarnitine, glutathione, superoxide dismutase, cytochrome oxidase, exertion, carnitine, 79
Acidosis, bicarbonate, pH, fatigue, 35
Active drag, swimming, drag force, front crawl, 21
Adrenaline, dopamine, exercise, noradrenaline, pancreatic polypeptide, rowing, 123
Aerobic and anaerobic power, strength, female athletes, growth, early and late maturation, training, 3
Aerobic dance, cardiorespiratory fitness, body composition, female, 189
Age and sex differences, pre-school children, motor test, motor performance, 219
Air resistance, long jumping, altitude, 89
Altitude, air resistance, long jumping, 89
Anxiety, behaviour, competition, orienteering, 39
Anxiety, stress, heart rate, abseiling, stress inoculation, 229
Assessment protocol, power, cyclists, 117
Behaviour, competition, orienteering, anxiety, 39
Bicarbonate, pH, fatigue, acidosis, 35
Bioengineering model, muscle forces, joint forces, running injury, 201
Biomechanics, sport shoes, kinematics, kinetics, 169
Body composition, female, aerobic dance, cardiorespiratory fitness, 189
Cardiorespiratory fitness, body composition, female, aerobic dance, 189
Carnitine, acetylcarnitine, glutathione, superoxide dismutase, cytochrome oxidase, exertion, 79
Coaching, computers, sports analysis, systems analysis, modelling, 49
Competition, orienteering, anxiety, behaviour, 39
Computers, sports analysis, systems analysis, modelling, coaching, 49
Cyclists, assessment protocol, power, 117
Cytochrome oxidase, exertion, carnitine, acetylcarnitine, glutathione, superoxide dismutase, 79
Dopamine, exercise, noradrenaline, pancreatic polypeptide, rowing, adrenaline, 123
Drag force, front crawl, active drag, swimming, 21
Early and late maturation, training, aerobic and anaerobic power, strength, female athletes, growth, 3
Electrolytes, muscle cramp, marathon running, exercise, 31
Electromyography, muscular economy, ski materials, ski movements, 129
Endurance, sprinting, endurance training, 109
Endurance training, endurance, sprinting, 109
Exercise, electrolytes, muscle cramp, marathon running, 31
Exercise, noradrenaline, pancreatic polypeptide, rowing, adrenaline, dopamine, 123
Exercise, pulmonary diffusion capacity, 185
Exertion, carnitine, acetylcarnitine, glutathione, superoxide dismutase, cytochrome oxidase, 79
Fatique, acidosis, bicarbonate, pH, 35
Female, aerobic dance, cardiorespiratory fitness, body composition, 189
Female athletes, growth, early and late maturation, training, aerobic and anaerobic power, strength, 3

Anxiety, stress, heart rate, abseiling, stress inoculation, 229
Assessment protocol, power, cyclists, 117
Behaviour, competition, orienteering, anxiety, 39
Bicarbonate, pH, fatigue, acidosis, 35
Bioengineering model, muscle forces, joint forces, running injury, 201
Biomechanics, sport shoes, kinematics, kinetics, 169
Body composition, female, aerobic dance, cardiorespiratory fitness, 189
Cardiorespiratory fitness, body composition, female, aerobic dance, 189
Carnitine, acetylcarnitine, glutathione, superoxide dismutase, cytochrome oxidase, exertion, 79
Coaching, computers, sports analysis, systems analysis, modelling, 49
Competition, orienteering, anxiety, behaviour, 39
Computers, sports analysis, systems analysis, modelling, coaching, 49
Cyclists, assessment protocol, power, 117
Cytochrome oxidase, exertion, carnitine, acetylcarnitine, glutathione, superoxide dismutase, 79
Dopamine, exercise, noradrenaline, pancreatic polypeptide, rowing, adrenaline, 123
Drag force, front crawl, active drag, swimming, 21
Early and late maturation, training, aerobic and anaerobic power, strength, female athletes, growth, 3
Electrolytes, muscle cramp, marathon running, exercise, 31
Electromyography, muscular economy, ski materials, ski movements, 129
Endurance, sprinting, endurance training, 109
Endurance training, endurance, sprinting, 109
Exercise, electrolytes, muscle cramp, marathon running, 31
Exercise, noradrenaline, pancreatic polypeptide, rowing, adrenaline, dopamine, 123
Exercise, pulmonary diffusion capacity, 185
Exertion, carnitine, acetylcarnitine, glutathione, superoxide dismutase, cytochrome oxidase, 79
Fatique, acidosis, bicarbonate, pH, 35
Female, aerobic dance, cardiorespiratory fitness, body composition, 189
Female athletes, growth, early and late maturation, training, aerobic and anaerobic power, strength, 3

Football League, home advantage, soccer, 237
Front crawl, active drag, swimming, drag force, 21
Glutathione, superoxide dismutase, cytochrome oxidase, exertion, carnitine, acetylcarnitine, 79
Growth, early and late maturation, training, aerobic and anaerobic power, strength, female athletes, 3
Heart rate, abseiling, stress inoculation, anxiety, stress, 229
Home advantage, soccer, Football League, 237
Isometric force, task specificity, strength training, power output, 101
Joint forces, running injury, bioengineering model, muscle forces, 201
Kinematics, kinetics, biomechanics, sport shoes, 169
Kinetics, biomechanics, sport shoes, kinematics, 169
Long jumping, altitude, air resistance, 89
Marathon running, exercise, electrolytes, muscle cramp, 31
Modelling, coaching, computers, sports analysis, systems analysis, 49
Motor performance, age and sex differences, pre-school children, motor test, 219
Motor test, motor performance, age and sex differences, pre-school children, 219
Muscle cramp, marathon running, exercise, electrolytes, 31
Muscle forces, joint forces, running injury, bioengineering model, 201
Muscular economy, ski materials, ski movements, electromyography, 129
Noradrenaline, pancreatic polypeptide, rowing, adrenaline, dopamine, exercise, 123
Orienteering, anxiety, behaviour, competition, 39
Pancreatic polypeptide, rowing, adrenaline, dopamine, exercise, noradrenaline, 123
pH, fatigue, acidosis, bicarbonate, 35
Power, cyclists, assessment protocol, 117
Power output, isometric force, task specificity, strength training, 101
Pre-school children, motor test, motor performance, age and sex differences, 219
Principal components analysis, speed skating, 141
Pulmonary diffusion capacity, exercise, 185
Rowing, adrenaline, dopamine, exercise, noradrenaline, pancreatic polypeptide, 123
Running injury, bioengineering model, muscle forces, joint forces, 201
Ski materials, ski movements, electromyography, muscular economy, 129
Ski movements, electromyography, muscular economy, ski materials, 129
Soccer, Football League, home advantage, 237
Speed skating, principal components analysis, 141
Sports analysis, systems analysis, modelling, coaching, computers, 49
Sport shoes, kinematics, kinetics, biomechanics, 169
Sprinting, endurance training, endurance, 109
Strength, female athletes, growth, early and late maturation, training, aerobic and anaerobic power, 3
Strength training, power output, isometric force, task specificity, 101
Stress, heart rate, abseiling, stress inoculation, anxiety, 229
Stress inoculation, anxiety, stress, heart rate, abseiling, 229
Superoxide dismutase, cytochrome oxidase, exertion, carnitine, acetylcarnitine, glutathione, 79
Swimming, drag force, front crawl, active drag, 21
Systems analysis, modelling, coaching, computers, sports analysis, 49
Task specificity, strength training, power output, isometric force, 101
Training, aerobic and anaerobic power, strength, female athletes, growth, early and late maturation, 3
